## DID YOU KNOW?

It is OKAY to eat AND sign at the same time!

Deaf people clear everything off of the table when they're out to eat. Why? Because otherwise, things like menus, condiments and glasses could be in the way of their signing conversations!

There is a Deaf-friendly restaurant called "Signs" located in Canada. This restaurant invites all guests to order their food in ASL! There are signs on their menu in case you don't know the sign for what you want.
