

LET'S

countdown

TO OUR NEXT THEME...3-2-1!

NUMBERS

Our ASL Leaders are so enthusiastic to introduce a *brand new* ASL Discoveries theme — Numbers!

Did you know...

American Sign Language has its own *unique numbering system*, with a variety of number incorporated signs, such as age and height, each having a different way to sign!

What also makes *American Sign Language* numbering unique is that *all of our numbers* are signed on *one hand!*

For our infant friends, we're going to discover how many hands, feet, fingers, and toes we have! What a fun way to learn counting!

Can you count how many
 are on this page?

Check our Numbers theme packet on
how to sign this number! _____
